

Look! No wires, maa...

A new range of wireless speakers will revolutionize the way we listen to music. **Shabbir Akhtar** writes. Also **website** of the month.

The world has come a long way. With tablets and smartphones popping from across the globe, computing has gone mobile. Yet, when it comes to pure music listening we are still tied down by docking speakers. But with the recent introduction of a wide range of wireless high performance speaker systems, listening to music will not be the same anymore. For example, Creative's new range of wireless speakers allow us to enjoy high quality music with our favourite mobile devices, without having to physically connect or dock the mobile devices to their speakers. The Singapore-based manufacturer has equipped its speaker systems to work with any compatible stereo Bluetooth device -- mobile phones, portable media players, netbooks, notebooks, tablets... the list goes on. The wireless Bluetooth speaker systems not only provide music lovers with innovative offerings and more choices in the personal digital entertainment space but also come at affordable prices. The recently unveiled D80 Wireless Speaker comes at an ultra-affordable price of Rs. 2500, and is aimed specifically at the youth. The range also includes the award-winning ZiiSound D5x and Inspire S2 wireless speaker systems. Here's a brief lowdown:

ZiiSound D5x Wireless Bluetooth Speaker

ZiiSound D5x wireless Bluetooth speaker, priced at Rs.17999, is a highly sophisticated device and has won the "red dot award: product design 2010" in audio category. The apt-X audio codec is a part of the Bluetooth technology and helps the speaker to deliver standalone performance. Using a bundled detachable iPod transmitter, the device can be connected to the iPhone, iPod and iPad. As for the audio clarity, it has high performance drivers and digital amplifiers.

ZiiSound DSx Wireless Bluetooth Subwoofer

The DSx wireless Bluetooth subwoofer works really well with

the D5x and D3x wireless Bluetooth speakers. It is based on the SLAM (Symmetrically Loaded Acoustic Module) technology and offers high-end audio experience to users. The DSx subwoofer can be placed almost

anywhere in the room and works even up to 30 metres distance from the modular speakers. It has a smooth and glossy look and adds bass enhancement when the user listens to music or watches films. Most importantly, it's seriously cost-efficient at only Rs.9999.

D100 Wireless Bluetooth Speaker

D100 wireless Bluetooth speaker, also codenamed the Wireless Boombox, is a great option for private listening as well as for parties. The D100 not only has a very lustrous and polished design but, also plays high end wireless audio. It's portable and can connect to any Bluetooth enabled device. It can be powered by 4 AA batteries and can connect to non-Bluetooth devices by AUX-In. It is available at an affordable price of Rs.4499.

D80 Wireless Bluetooth Speaker

The Bluetooth powered Creative D80 wireless speaker has dual 3 inch drivers to provide an amazing audio experience. It can play music from any type of Bluetooth compatible device like the iPhone, iPad, Android, Blackberry and others. It has

AUX-In connectivity, due to which, even if a device is not Bluetooth equipped, D80 can be connected to it. The product is optimal for the youth not only because of its ultra-affordable price but, it is also available in different colours like pink, green, white and black grills suit the user's personality.
